

Install your new natural gas-fired furnace or boiler.

All equipment must have an Annual Fuel Utilization Efficiency (AFUE) of 94% or higher. AFUE is a measure of how efficiently equipment uses the fuel source.

To find a list of qualifying equipment with an AFUE rating of 94% or greater visit efiredirectory.org.

1

Complete and sign the online or print application.

Visit pgandenergysense.com

INCLUDE:

- ▶ Itemized invoice showing manufacturer model#, date & proof of purchase
- ▶ Copy of AFUE certificate
